AAC
GOLDRUSH
CWRW Wheat

Seeding For Gold

AAC Goldrush is a next generation high yielding CWRW with excellent winter hardiness. It comes with good standability, strong rust resistance and ‘I’ to FHB.

Highlights

• Very high yielding; 111%* of the check
• Excellent winter hardiness
• Strong straw and medium height
• Strong package
  » ‘R’ to leaf rust, ‘MR’ to stem rust
  » ‘I’ to FHB and stripe rust

Insights

“AAC Goldrush had very good winter survivability through some very tough conditions in the two seasons we have grown it through the Fall/Spring of 2016/17 and 2017/18. This extremely important when growing winter wheat in southern Saskatchewan where snow cover can be variable and spring moisture scarce. I have only combined one crop so far but was impressed with the yield and HVK (hard vitreous kernels) of the seed. I hope it becomes a very successful variety for southern Saskatchewan farmers.”

- Nicholas Petruic, Avonlea SK

“AAC Goldrush is being launched for growers that are looking for a CWRW variety with high yields, a strong disease package and excellent standability. To date, it has been reported that this product is showing very good winter hardiness which is a compelling feature for any winter wheat.”

- Herman Wehrle PAg., Director of Market Development, FP Genetics Inc.
