

# AAC Hockley - New 2023

## Canadian Western Red Spring

AAC Hockley is the next generation in genetic potential offering consistent high yields and improved grain protein. This semi-dwarf variety has industry-leading standability, significantly better than all checks and can stand up to an intensive fertilizer management plan. The disease package is excellent, with 'MR' or better for all priority one diseases including FHB. Dr. Richard Cuthbert calls AAC Hockley his AAC Brandon replacement.

- Consistently high yields
- Industry-leading standability
- Short, semi-dwarf
- Good protein
- Unsurpassed disease package
  - 'MR' or better for all P1 diseases
  - Strong FHB resistance, low DON accumulation

Parentage: BW388/BW430

Variety	Yield (% Carberry)	Maturity (days)	Height (cm)	Lodging	Test Weight (kg/hL)	Kernel Weight (mg)	Protein (%)	Stem Rust	Leaf Rust	Stripe Rust	Bunt	FHB
