

AAC Chrome

Yellow Pea

A proven yield leader that outshines the competition in all three prairie provinces with superior yields and agronomics that allow for a fast, efficient harvest.

- Highest yielding yellow pea available in the market today
- Rated 'G' for seed coat breakage
- Easy to harvest
- Resistant to Powdery Mildew, 'I' for Fusarium Wilt
- Semi-leafless
- Short vine length

Parentage: Polstead/CDC 715S-4

Variety	Brown Soil Zone (% of Check)	Black & Grey Soil Zone (% of Check)	Protein vs AAC Lacombe	Relative Maturity	Lodging (1-9)*	Vine Length (cm)
AAC Chrome	109%	101%	-0.3	M	+1	-10
AAC Profit	104%	108%	1.5	M	+1	+5
AAC Lacombe	100%	100%	22.3	M	3.5	85

Lodging scale 1-9; 1 = Erect, 9 = Flat
