

CDC Silas

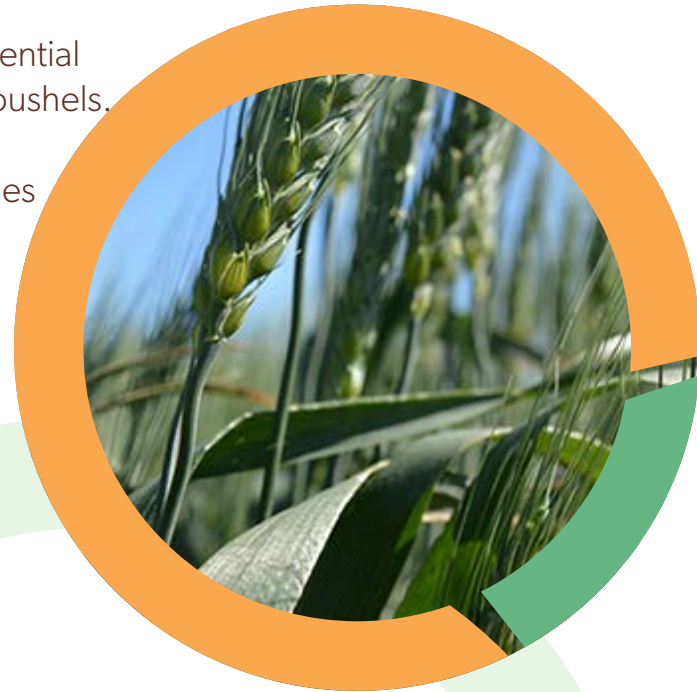

Canada Western Red Spring

Semi-dwarf
Good standability
Strong rust resistance

Unleash the Potential

CDC Silas is a NEW CWRS that offers very high yield potential and good standability for growers looking to maximize bushels. CDC Silas is a short semi-dwarf displaying slightly earlier maturity than commonly grown CWRS varieties. It includes a good disease package and shows good grade results making this variety a quality choice for today's progressive farmer.

- Very high yield potential 112% of Carberry in registration trials
- Maturity equal to Carberry

Maturity:	+0.3 days vs. Carberry
Height:	+ 1 cm vs. Carberry
Lodging resistance:	Good (2.3)
FHB resistance:	I
Stem rust resistance:	MR
Leaf rust resistance:	R
Stripe rust resistance:	I
Bunt:	MS

Strengths

CDC Silas is higher yielding than three of the four check cultivars with intermediate height and low lodging scores.

Neutral

A day later maturity than Carberry.
